#### The Educa's Wistakes

The editor of a toca: pap r 1fier unjustly consured for his Paul's will all him the chemist's si istakes. The wonder is that han kerchief. e doesn't make more of them. "Look be e!" he grunted as he ope te has to deal with all kinds of ed his walstcoat "Look here! f subjects, give the names, it five raised thirteen pounds i ares, etc. One hour he may be weight this last formight, and yo ngaged in reporting a religious you mirerable little pill pounder, as seeting and the next in drawing O'e o' would give me the figure of picture of a fight. He must Greek god. There's the pot. Brin one ense and fill with his items everal columns, whether events re transpiring or not. Count ne local items in a paper and vork it must cost to get them. guaranteed would keep your retriever' The smallest may have cost him im a great deal of effort to each the facts. When one paner is off the press, he must rounds in search of news and probably not get a line. His ocal columns stare him in the face and must be filled not with and matters of interest. His field of labor may be limited, est to his readers. Constant althworry, and an endless varies ty of subjects to touch upon, is it at all surprising that he should make a few mistakes? Other people make mistakes, why shouldn't an editor?-The Pioneer News (Quay county.)

#### THE WATERMELON.

Africa is the Original Home of Tha Luscious Fruit.

The humarists always associate the African with the watermelon, assummg that the taste of the colored man for his favorite damag arises from his life in the southern states, where the melon vine grows like a weed.

As a fact, however, the African tasts for the watermelon is hereditary. The vine is a native of Africa, where it is at Alamogordo, N. M., on the 20th day | Jed R. Yale, | of found wild in the great central postes of April, 1911. of the continent, and has also been cultivated for many ages.

In Egypt the melons grown along the | A. B. Dilly, Nile rival those of southeastern Mis- H. W Loomis, of

White in Egypt were undoubte its
watermetons, for in the wall plantings
about the time of the exodus the molevine is represented, and in one case a watermelous, for in the wall pulatings vine is represented, and in one case a long procession of slaves is depicted each bearing on his shoulder a huge fark green watermelon.

Botanists say that varieties of the over every other kind of vegetable of fruit the African merely displays a taste that has become fixed in his race by thousands of years of indulgence. for in central Africa ripe watermelol. are to be had every month in the year -Detroit News-Tribune.

### HORNET SENTINELS.

It Would Seem That These Insects Keep Guard Over the Nests.

Is a hornets' nest guarded by sentinels, after the manner of ant hills? It is not so easy to decide, for their private habits do not invite familiar approach. But some experiments seemed to point that way. No noises. however near or strident, had the least effect upon the workers. Blow on divers instruments as loudly and shrilly as I would, they poured in and out of the gate or labored on the walls. intent wholly upon their own affairs. But at the slightest jar upon the window or shutter, out flew a bevy of trate insects and flung themselves against the wire window screen with an angry "bump" that showed how good was their intention at least to defend their home. It was always so. A squad of workers, free and ready for aggressive duty, seemed to be lurking near the gate, prompt to saily forth opon alarm. Even at night a few kept near by, and, although their port had lost its vicious swing and they moved about with singgish pace, like sleep; watchmen, as doubtless they were. they left upon the observer the impression that they were on sentinel service, in which the community was never lacking.-Dr. H. C. McCook in Harper's Magazine.
